Profile

Data Analyst skilled in Python, SQL, Power BI, Tableau, and Excel with experience in building dashboards, performing end-to-end data analysis, and generating actionable business insights. Strong at DAX, data modeling, and storytelling through visuals. Seeking data analyst roles where I can contribute analytical thinking and business-focused insights.

Experience

Freelance Data Analyst | Jan 2024 – Present | Ahmedabad

• Designed Tableau dashboards to analyze accident data and identify high-risk zones.

• Built logistic regression model (Titanic dataset) achieving 78% accuracy.

• Performed end-to-end analysis using Python, SQL, Power BI, and Tableau.

• Executed complete workflow: data cleaning, modeling, visualization, insight reporting.

Projects

Reliance Business Performance Dashboard (Power BI, DAX)

• Developed multi-page dashboard comparing Retail (FMCG) and Fuel division performance.

• Structured synthetic dataset with seasonality; performed Power Query transformations.

• Built star-schema model with Date Table and relationships.

• Created DAX measures: Total Sales, Profit, Margin %, MoM Growth, YoY Trends.

• Insights: seasonal demand patterns, top regions, margin inconsistencies, revenue gaps.

Cleaning Services Performance Dashboard (Power BI)

• Built operational + financial performance dashboard for cleaning services company.

• KPIs tracked: Total Revenue, Avg. Hours Worked, Customer Rating, Productivity Score.

• Visualized revenue by suburb, service type, and monthly trends.

• Added slicers for Date, Suburb, Service Type, Payment Status.

• Insights: high-performing suburbs, strong service categories, seasonal changes.

Skills

Python (Pandas, NumPy, Matplotlib), SQL, Power BI, DAX, Tableau, Excel, Data Modeling, EDA, Dashboarding, Visualization
